OBJECTIVE

Aspiring Cloud DevOps professional with hands-on experience in containerization, Infrastructure as Code (IaC), and cloud-native technologies, aiming to enhance software delivery and operational efficiency while thriving in a collaborative, innovative DevOps environment.

EDUCATION

Aditya University

Master of Computer Applications |SGPA:9.15

2024 – 2026(Expected)

Surampalem, Andhra Pradesh, India

Aditya Degree College

Bachelor of Computer Applications |CGPA:8.96

2021-2024

Kakinada, Andhra Pradesh, India

SKILLS

Coding: Python, Java, Data Structures

Database: MySQL, NoSQL

Cloud Computing: AWS(EC2, IAM, S3, Load Balancer, Auto Scaling, Lambda)

DevOps & Automation: Proficient with containerization using Docker, CI/CD pipelines with Jenkins, infrastructure as code using Terraform, cloud automation using AWS CLI, CloudShell, Python scripts, and Bash, along with event-driven automation through CloudWatch Events and IAM Roles.

Tools and Platforms: Linux System Administration, Git & GitHub

SOFT SKILLS

Team collaboration, Time management, Communication, Attention to detail, Leadership.

ADDITIONAL INFORMATION

Languages Known: Telugu(Native), Hindi(Conversational),English(Fluent).

PROJECTS

1.Automated Backup of S3 Files using AWS Lambda, SNS, and CloudWatch

I designed and implemented a serverless solution that automated the backup of files stored in an Amazon S3 bucket. The solution leveraged AWS Lambda to execute the backup logic, Amazon SNS to send real-time notifications, and Amazon CloudWatch to provide event-driven triggers and continuous monitoring, ensuring reliable, timely backups without manual intervention.

2. Server Automation using AWS Lambda and EC2

I developed an automation system to start and stop EC2 instances on schedule using AWS Lambda. By integrating CloudWatch Events, the solution reduced manual effort and optimized cloud costs.

CERTIFICATION

- **AWS Certified Cloud Practitioner** – Amazon Web Services (Sept 2025)
https://www.credly.com/badges/2f7ee76b-c8fc-4adc-8559-497c70cc8652/public_url
- **C Programming** – Cisco Networking Academy
Gained foundational knowledge in structured programming, functions, and memory management.
- **Python Essentials** – Cisco Networking Academy
Developed problem-solving skills using Python; covered data types, loops, functions, and basic OOP.
- **Java Foundations** – Oracle Academy
Learned object-oriented programming, control structures, and core Java concepts with hands-on practice.
- **Database Management Systems (DBMS)** – Oracle Academy
Studied relational models, SQL queries, normalization, and database design principles.
